

# ETTP Cleanup and Transfer Process

## Airport Parcel (Centrifuge Area) Schedule

### Recent Accomplishments – 2021

- Drafted City's 10 CFR 770 property request for additional 56 acres (Phase 2) in February
- Requested and received EPA and TDEC's approval for deep geotechnical borings in April
- Expedited cleanup schedule by conducting soil sampling and remediation in parallel for Centrifuge Area
- Developed streamlined transfer process to better manage review and approval time
  - Presented to EPA and TDEC management and received approval in April
  - Presented to EPA and TDEC transfer approvers and received their permission to proceed in July
- Coordinated S&ME site access for multiple data gathering events and also provided historical data

CERCLA 120(h): Regulatory process for transferring real property

CDR: Covenant Deferral Request document created to describe previously contaminated property that has been cleaned up

Clean Parcel Determination: designation for uncontaminated land

NFA: No Further Action
